UMAXX

- TAP WATER SUPPLIED FROM BLENDING VALVE
- 3 LITRE FLOW RATE AT 3 BAR PRESSURE
- UNIVERSAL PRESSURE PERFORMANCE FROM 0.3-10 BAR
- BATTERY OR MAINS
- BATTERY LIFE UP TO 4 YEARS, BASED UPON 150 OPEN CLOSE SEQUENCES PER DAY
- RRP £250 (AUGUST 2020)
- ANNUAL WATER SAVING OVER MANUAL TAP IS EQUAL TO 73 CUBIC METRES (£219.00 FINANCIAL SAVING BASED UPON THAMES WATER COMMERCIAL PRICING)
- THE TAP PAYS FOR ITSELF IN LESS THAN 1 YEAR

WAT 01 Water Consumption

KEY BENEFITS OF THE RANGE

What are the benefits of Conti+ hands-free taps?

Sustainable

CONTI+ touch-free taps offer water savings of up to 70% compared to traditional taps. The use of high-quality materials and components means you'll get years of trouble-free operation.

Hygienic

CONTI+ taps are completely hands-free, so protect users against bacteria transfer. Germ buildup within the unit is prevented through the use of bacteriostatic materials and hygienic rinsing.

Energy saving

You can extend the battery life of your CONTI+ taps for up to eight years using solar power generated from natural and artificial light or by generating electricity from the integrated water-driven turbine.

Stylish and attractive

CONTI+ hands-free sensor taps offer a range of attractive and stylish designs, making them suitable for installation in any environment, from factories and surgeries to hotels and executive washrooms.

Water saving

A choice of aerators offers you low flow rates of as little as 2 litres per minute. Water flow delay time can also be reducing, cutting water consumption even further.

Low maintenance

A single allen key is all you need to open the tap. Afterwards, tool-free servicing can be carried out in seconds via connector-free plug-and-play.

Secure

CONTI+ hands-free taps offer automatic sensor adjustment, security shut-off after 90 seconds, low battery indication and safety shutdown in the case of power failure.

Modular design

CONTI+ designs are developed using an intelligent modular design, offering you the flexibility of an individual, tailor-made tap for any environment or application.

CONTI+ taps use up to 70% less water than traditional taps
